➤ **Keywords**

Keywords are textual information that is entered during creating a patient file. These keywords help in fast & efficient retrieval of patient records, refer to the similar cases and procedures done earlier.

➤ **Interface with digital pen**

3iCare Practice Manager-OBG has been interfaced with the digital pen, which will allow user to attach notes, write prescriptions etc.

➤ **Interface to Export data to Laptop**

➤ **Multi Media Database**

- Has a built-in document management feature which allows you to scan x-rays, ultrasound images, laboratory reports etc. and add them to the patient file.
- Has a communication engine using which you can establish contact with laboratories. Patient test results could be electronically mailed direct to the computer - thus providing that extra time which could prove invaluable. This facility will also help you in sending across entire patient files to your colleagues for their opinion and also establish electronic communication with your patients.
- Allows you to create a multimedia medical database. Patient file can contain data, scanned documents, important conversation between you and the patient, pictures, video clips etc.
- Interfaced with digital cameras, which will allow you to photograph rare cases and store them along with the patient file.

3iCare Practice Manager-OBG Advantages

To You - the Doctor

- Time spent on writing the patient file is reduced by nearly 95% - which means more quality time can be spent with the patient
- Your patient files are available to you at any time - all the time
- ALL information about a patient - case sheets, x-rays, ultrasound images, laboratory reports, etc. is part of the patient file
- Patient records are created on-line - no delay.
- You will be able to cross-reference your patient files for astute medical analysis
- You can create your own personal reference database of labs, hospitals and doctors
- You will have all your files easily accessible in case you need them for legal matters.

To Your - Patient

- Computer generated reports eliminating any ambiguities
- On the spot reports eliminating the need of a repeat visit to pick up reports.
- Printed prescription instructions making it clear what to take, how much to take and when to take it.
